SWEDEN

1. Geography

Sweden lies in the northern part of Europe, occupying the southern and eastern parts of the Scandinavian peninsula, including the island of Gotland and Öland in the Baltic. Its length is about 900 miles; the extreme breadth (mainland) is about 250 miles, and the total area, inclusive of inland waters, is 173,654 sq. miles. Sweden has common borders with Finland and Norway.

Though abounding in hills and highlands, Sweden is not a mountainous country. Even in the north, the mountains are of only medium height, the highest reaching about 7,000 feet.

Rivers and lakes make up nearly one-tenth of the entire area of Sweden. Vänern, in the west, is the largest lake in Europe, outside of the Soviet Union. It drains into an arm of the North Sea by the short navigable Göta River.

Sweden is the fourth largest country in Europe after Russia, France and Spain.

The total area is made up of:

Urban	5.7%
Field and pasture	10.4%
Forest	54.7%
Other land	29.2%

Sweden may be divided into six major economic regions, each dominated by activities closely related to its environment. These include:

1. Southern Agricultural Region, where relatively mild climate, fertile soils, and ready markets for farm products all favour agricultural activities.

2. Mixed - Forest Industries Region, where relatively infertile soils, and a comparatively bleak climate are better suited to forest industries than to crops.

3. Agricultural Industrial Heartland, where conditions foster optimum development of both, industry and agriculture.

4. Coniferous - Forest Industries Region, where cool and short summers practically exclude agriculture except along the coast, but where coniferous forests, water power resources and proximity to Western European markets - via ocean, favour lumbering and the woodworking industries.

5. Mining Region, which contains and exploits the largest high-grade iron ore deposits of Europe.

6. Pastoral Zone, which is a continuation of a similar region in Norway.

The largest import, export, transit and distribution centers in Sweden are: Stockholm, Gothenburg and Malmö.

2. Population

The total population of Sweden was 7,844,000 at the end of 1966. Other major cities are: Gothenburg, with 443,000 inhabitants and Malmö, with 255,000 inhabitants. The density of the population is 44 persons per square mile. Close to 90% of the population live in the southern half of the country. Natural increase in Sweden is 5.8 per 1,000 of population and is one of the smallest in the Western world.

Population projection in Sweden is:

1970	8,064,000
1975	8,392,000
1980	8,703,000
2000	9,780,000

(Statistical Abstract of Sweden)

The population forecast assumes a continued annual net immigration of 10,000 persons. Since the number of persons emigrating appears to have stabilized at around 15,000 per year, the size of the net immigration will depend on the number of immigrations. The major part, 75% of the immigration surplus comes from the other Nordic countries, with Finland as the dominant country.

Aside from some recent arrivals, the only ethnic minorities in Sweden are about 10,000 Lapps in the north, and 30,000 Finns, who have settled close to the Finnish border.

The mounting shortage of manpower is one of the most serious problems of the Swedish economy. In 1966, the scarcity of labour was reduced and at present a relatively good balance prevails between demand and supply of labour. The trend in occupation is away from agriculture and towards the retail and wholesale trade, transportation and administration.

Employment in different sectors in Sweden, 1950-1965, changes and projections to 1970, are as follows:

000's persons

	1950	1960	1965	1970	Change 1950-1960	Change 1960-1965	Change 1965-1970
Agriculture	545	360	265	195	- 185	- 95	- 70
Forestry	75	85	70	55	+ 5	- 15	- 15
Fishing	15	10	10	10	- 5	- 0	- 0
Total agriculture, forestry, fishing	635	450	345	260	- 185	-110	- 85
Mining and manufacturing crafts, etc.	985	1,040	1,120	1,165	+ 55	+ 80	+ 45
Power, etc.	30	35	35	35	+ 4	- 0	+ 0
Building and construction	245	290	335	365	+ 45	+ 45	+ 30
Total mining and manufacturing, power, building, etc.	1,260	1,365	1,490	1,565	+ 105	+ 125	+ 75
Total production of goods and power	1,890	1,820	1,835	1,825	- 75	+ 10	- 10
Communications	250	260	265	270	+ 10	+ 5	+ 5
Trade	370	435	455	465	+ 65	+ 20	+ 10
Private services including housing administration	275	310	325	340	+ 35	+ 15	+ 15
Public services	295	410	515	605	+ 120	+ 100	+ 90
Total services sector	1,190	1,420	1,560	1,680	+ 230	+ 145	+ 120
Total-(1)	3,105	3,245	3,400	3,510	+ 140	+ 155	+ 110

The percentage distribution of labour in Sweden, by sectors, 1950-1970, was as follows:

	1950	1960	1965	1970
Total goods and services	20.4	13.9	10.0	7.6
Total mining, and manufacturing, power, building and construction	40.5	42.0	43.7	44.5
Total services	38.3	43.7	45.9	47.8
Total goods and services	100.0	100.0	100.0	100.0

Note: (1) Including unspecified activities.
The figures have been rounded off, consequently the total and change figures do not always agree.

Source: The Swedish Economy, 1966-1970.

3. Climate

Wide divergencies in climate exist in the various parts of a country as extensive as Sweden. Lapland in the far north, has seven months of winter and two months of summer, while Skane in the south, has a two month winter and a four month summer. In some northern parts, frost occurs in every month of the year. Due to the Gulf Stream sweeping along the west coast of the Scandinavian peninsula, a part of Sweden enjoys a temperate climate.

February, the coldest month in Sweden, has a mean temperature below 32'F, (Stockholm averages 25.7'F). July is the hottest month, (Stockholm's average is 62'F.)

Ice conditions in the Baltic vary considerably from year to year, but usually navigation in the southern part of the Gulf of Bothnia is impeded from the end of November to the beginning of May.

Average yearly precipitation is 20 inches. The amounts of precipitation are generally adequate for agricultural purposes. Precipitation is heaviest in western Sweden and lighest in the southeastern areas.

4. Constitution and Government

Sweden is a parliamentary democracy with a King as head of the State. It is a constitutional monarchy. The Constitution is based primarily on the Constitution Act of 1809. Executive and judicial authority is vested by the King, but his resolutions must be countersigned by a member of the cabinet and the legislative bills must be approved by the government as well as by the Parliament. The cabinet is appointed by the King and is responsible to the parliament.

Political power is concentrated in the Cabinet and in the Parliament (Riksdag) and the role of the Monarch is mainly representative and symbolic.

The Swedish Riksdag (parliament) is bicameral. Members of the Upper House are elected by county councils (Landsting) and the councils of the four largest towns, while the members of the Lower House are directly elected by universal suffrage. The two chambers have equal authority and their agreement is required to enact a bill.

Local government functions are performed by the 25 County Councils and 767 Municipal and Local Councils.

Justice is administered by tribunals of three levels: Rural and Town courts, Courts of Appeal and Supreme Court of Justice.

The present King is Gustav VI Adolf, and the present Premier is Tage Erlander.

The 1964 general election was won by the Social Democrat Party (113 seats out of 233 total). This party has ruled in Sweden for a period of 32

consecutive years, but without an absolute majority.

In the autumn of 1968, the country faces a general election.

During the Second World War, Sweden was the only Scandinavian country able to preserve her neutrality. Sweden is enjoying exceptional political stability.

5. Economy - General

Sweden, which not many decades ago was mainly an agricultural country, has developed into a modern, highly industrialized state with an expanding economy and a continuously rising standard of living.

The beginning of the great industrialization of Western Europe created an increasing demand for Sweden's forest products and minerals; consequently, forestry and mining, together with associated manufacturing industries, have grown rapidly. Hydroelectric installations and trade have grown more rapidly than agriculture. As a result of these industrial and commercial developments, less than 10 per cent of Sweden's people depend upon agriculture for a living.

Since 1945, Sweden has undergone sweeping social reforms which have resulted in a standard of living which, today is among the highest in the world.

In the last decade, the Swedish economy has shown a steady expansion. Employment is at a high level and there are prospects of a growing strain on the labour market. The supply of labour is not sufficient to satisfy the high demand and it is becoming increasingly difficult to fill the vacancies. In Sweden, there are even plans to try to recruit skilled American workers, especially for the construction and automotive industries.

Private ownership of business enterprises is predominant in the Swedish economy. Government ownership is primarily limited to a few special sectors such as iron mining, public utilities and transportation, where government-owned enterprises account for over half of the produced goods and services. In 1966, about 190,000 people were employed by government-owned companies. This was 5.5 per cent of total business employment.

Sweden's economy has developed favorably in many respects during the first half of the sixties. In particular, there has been a substantial acceleration in the growth of production.

The structure of the Swedish economy has been changing quite rapidly in recent years. In 1960, 14% of the labour force was employed in agriculture, forestry and fishing; by 1965, the ratio had fallen to 10% and the Swedish Long-Term Survey published in 1965 expected a further decline to 7.5% in 1970. There has been a marked structural rationalization within industry in the last few years, with a movement of capital and labour towards high productivity sectors such as the engineering industry, while output in the textile, clothing and shoe industries has increased little or fallen.

There has also been a steady tendency towards bigger production units

reflected in the mergers and in the closing down of smaller firms. In 1966, there were nearly 300 industrial mergers and long-term collaboration agreements between firms in Sweden.

5a. Transport

The total length of the Swedish railroads is about 8,600 miles. The Government owns about 94% of the Swedish railroads measured in mileage, and accounts for about 95% of the traffic volume.

Railway traffic in Sweden, 1961-1965, was as follows:(1)

	1961	1962	1963	1964	1965
Passenger-kilometres (millions)	5,310	5,353	5,237	5,371	5,297
Net ton-kilometres (millions)	11,120	11,064	12,015	12,919	13,802

Passenger traffic on Swedish railways declined again in 1966. Freight traffic increased in 1966, compared with 1965 by about 200 million ton-kilometres.

According to United Nations Statistical Yearbook, Sweden's merchant shipping fleet, 1961-1966, was as follows:

	1961	1962	1963	1964	1965	1966
	----------thousand gross registered tons----------					
Total	3,996	4,167	4,176	4,308	4,290	4,400
Tankers	1,349	1,401	1,442	1,463	1,397	1,506

Swedish merchant marine, as of June 30, 1966, was 2.6 per cent of world tonnage.

Shipping between Swedish and Foreign Ports, 1963-1965, was as follows:(2)

		1963	1964	1965
Tonnage Loaded	('000 tons)	18,783	21,463	21,504
Tonnage Unloaded	(" ")	27,957	29,637	32,070
Vessels Entered	('000 net registered tons)	14,925	15,947	16,951
Vessels Cleared	(" " " ")	9,913	11,275	11,072

Tonnage arriving at Swedish ports from abroad increased by 5% in 1966. A total of 55 million tons of goods were loaded and unloaded in foreign traffic, which is an increase of 4% on the year 1965.

Note: (1) Source: United Nations: Statistical Yearbook.
(2) Source: The Europa Yearbook.

Civil aviation in Sweden is strong. Expansion of the Scandinavian Airlines System (SAS), 1950-1966, was as follows:

		1950	1960	1965	1966
Number of passengers	(thousands)	425.3	1,880.3	3,066.9	3,276.8
Ton- miles	(millions)	9.6	34.5	78.6	89.0
Miles flown	(millions)	14.6	37.9	40.4	42.5

According to "The Swedish Economy" 1966-1970, domestic passenger traffic and domestic goods traffic, 1950-1964, and projections 1970, were as follows:

A. Domestic Passenger Traffic

000' million passenger kilometres

	1950	1960	1964	1970
1. Passenger cars	5.6	33.2	50.5	73 à 79
2. Buses	3.5	3.4	3.5	3.9 à 4
3. Trams, underground railways	1.2	0.9	1.3	ca 1.3
4. Railways	6.6	5.2	5.3	5.1 à 5.4
5. Shipping	0.2	0.1	0.1	ca 0.1
6. Aviation	0.0	0.2	0.3	ca 0.5
Total (1—6)	17.2	43.0	61.0	84 à 90
Of which collective (2—6)	11.6	9.8	10.5	ca 11

B. Domestic Goods Traffic (trucks, railways and shipping)

000' million ton kilometres

	1950	1960	1964	1970
Trucks, haulage contractors	1.1	3.6	5.1	ca 9
,, , other	1.6	3.3	4.8	ca 7
Trucks, total	2.7	6.8	9.9	ca 16
Railways, Lapland ore	1.8	2.4	3.0	4 à 4.5
,, , other	6.9	8.5	10.0	11.5 à 12
Railways, total	8.6	10.9	13.0	ca 16
Shipping	2.4	2.2	2.7	ca 3
Total	13.7	19.9	25.6	ca 35

6. Agriculture

Agriculture in Sweden is carried out chiefly on small family owned farms. Of the 414,000 farm units in 1961, about 75% had 25 acres or less. Only 2% had 125 acres or more.

In 1961, the total land area in Sweden was 41,125,834 ha, of which:

Arable land	3,341,578 ha
Natural pasturage	348,694 "
Cultivated natural pasturage	162,052 "
Forest	22,505,362 "
Other ground	14,768,148 "

The arable land is mainly in the south of Sweden, where most of the large estates still are found. Farming in northern Sweden generally is combined with forestry.

Sweden's postwar agricultural policy has been aimed primarily at self-sufficiency. In carrying out this policy, the government has, among other things, adopted measures to promote the consolidation of small uneconomic farms units: improvement in land layout and in cultivation through increased mechanization; more effective use of fertilizers; the use of better seed; and improvement in livestock management.

According to recommendations recently made by a Government committee on agriculture, the degree of self-sufficiency should be 80% instead of the previous 93%.

The yield per acre in Sweden is high and is exceeded by few countries in Europe. Wheat cultivation, through scientific plant breeding, has been extended almost to the Arctic circle. Sugar beets are grown in southern Sweden and on the islands of Oland and Getland, the crop being nearly equal to the domestic demand.

Area yield per hectare and production in Sweden, 1962-1965, were as follows:(1)

CROPS	AREA (in thousand hectares)				YIELD PER HECTARE (in quintals)				PRODUCTION (in thousand tons)			
	1962	1963	1964	1965	1962	1963	1964	1965	1962	1963	1964	1965
Wheat	314	244	270	288	27.7	30.2	39.4	35.4	872	696	1,065	1,038
Rye	75	40	43	63	23.2	20.9	29.9	28.8	175	76	119	169
Barley	370	482	470	498	26.2	25.7	31.2	30.8	970	1,155	1,375	1,437
Oats	516	517	510	478	21.1	24.1	30.5	30.2	1,087	1,156	1,448	1,340
Mixed Grains	200	191	177	156	27.2	24.0	27.7	28.2	483	429	456	410
Potatoes	95	94	81	73	137.6	232.4	181.9	211.2	1,308	1,908	1,477	1,542
Oleiferous Plants	84	79	106	99	21.7	16.7	20.0	22.3	157	125	212	221

Note: (1) Source: The Europa Yearbook.
Note: 1 hectare= 2.471 acres (1 acre= 0.4047 hectares)
1 quintal= 100 kilograms= 220.46 pounds
1 ton= 1000 kilograms= 2,204.6 pounds

The volume of agricultural production has remained fairly stable in the last two decades in spite of the movement of labour from agriculture to other occupations and decrease in the cultivated area.

The maintenance of production has been achieved through an increasing degree of mechanization and through mergers of adjacent farms into larger units of production.

The persistent outgo of labour from agriculture has led to a considerable decline in the Swedish agricultural labour force. The percentage engaged in agriculture of the total labour force was 28.9% in 1940; 13.9% in 1960 and 9.5% in 1966.

Simultaneously with the migration from agriculture, the area of arable land is expected to decrease. This will also reduce the contribution of agriculture to G.N.D.

The principal aim of Swedish agricultural policy is to give the agricultural population the same opportunities as other groups of reaching a reasonable standard of living. For this reason the Government maintains artificially high prices to the consumer.

The livestock population in Sweden, 1961-1965, was as follows:(1)

('000)

	1961	1962	1963	1964	1965
Horses	194	179	149	133	109
Cattle	2,575	2,661	2,421	2,311	2,250
Sheep	171	182	184	218	220
Pigs	2,034	2,115	1,791	1,865	1,884
Fowls	9,340	9,263	9,495	9,615	8,778

The selected livestock production in Sweden, 1962-1964, was as follows:

('000 tons)

	1962	1963	1964
Total Production of Milk	3,927	3,782	3,635
Meat and Pork	387	383	384
Eggs and Poultry	94	96	99

Source: Statistical Abstract of Sweden.

Milk is the most important farm product and accounts for 38% of the total sales. One third of the milk production is consumed directly while two thirds is used mainly to make butter and cheese. Meat is next as a source of the farmers' sales revenue. Eggs are the most important of the remaining products.

Note: (1) Source: The Europa Yearbook.

6a. Fishing

The Swedish fishing industry produce has almost doubled in quantity during the past two decades. Sweden has a fleet of 16,457 fishing craft. The number of professional fishermen has decreased considerably, from 11,000 in the middle of the fifties to about 8,000 at present.

Fishing, in quantities and values, 1958-1965, was as follows:

YEAR	QUANTITY ('000 tons)		VALUE (million kronor)	
	Herring	Total	Herring	Total
1958	118	238	62	154
1959	139	268	69	171
1960	150	259	75	173
1961	151	267	78	188
1962	162	283	98	216
1963	193	327	92	210
1964	183	366	98	234
1965	184	357	131	263

Swedish fishermen are active on the Baltic Sea, the Kattegat and the Skagerrack, the North Sea and parts of the North Atlantic.

7. Forestry

The forests, covering 57.3 million acres, or more than half of the land area, are probably the nation's greatest single source of wealth. About 40% of the nation's forest area consists of Scotch pine (Pinus Silvestris) and approximately 45% of spruce (Picea Abies). Almost one third of total Swedish export receipts stem from the forest sector, which sells more than half its production abroad.

Ownership of the forests, in per cent, is as follows:

private owners	51%
corporations, about	25%
the State	19%
the church and other public bodies, about	5%

Swedish timber is generally of a high quality. Sweden has highly developed forest conservation and intensive research programs. These programs are designed to maintain the high quality of Swedish timber products.

The estimated yearly cutting in Sweden, 1920-1965, was as follows:

Year	(Millions of cubic feet**) Saw logs	Pulp wood	Fuel wood	Other wood	Total
1920	460	210	705	175	1,550
1935	460	460	565	70	1,555
1950	540	455	390	85	1,470
1955	680	770	260	90	1,800
1960	760	905	210	75	1,950
1963	720	955	182	48	1,905
1964	839	1,059	177	44	2,119
1965	852	1,101	165	44	2,162

*) Solid volume including bark. Roughly, this may be converted into volume excluding bark by subtracting 1/5th.

**) 1 cubic foot = 0.028 cubic meters.

Source: Some Data About Sweden.

The consumption of pulpwood has risen during the past ten years by approximately 43%. At the same time a minor increase has been noted in the consumption of sawn timber while the use of firewood has continued to decline.

The annual growth is estimated at about 68 million forest cubic metres and each year about 50 million forest cubic metres are felled. The forests of Sweden are protected carefully and replenished through efficient silviculture.

The labour employed in forestry is declining and it is expected to decline still further. The smaller requirement for labour is due in this case to a very high rate of mechanization.

8. Mining

Mining, carried on in two widely separated regions, is devoted mainly to iron ore extraction.

About 33 million tons of ore are produced per year, with iron ores accounting for 30 million tons. The remainder consists of sulphide ores containing sulphur, copper, lead, zinc, arsenic, etc. as well as small amounts of silver and gold. In addition, about 7 million tons of limestone are quarried. Sweden also has large deposits of bituminous shales containing oil and uranium, but their extraction is not yet economically feasible.

The mining region of central Sweden is important for low-phosphorous iron ore, upon which the domestic high-quality iron and steel industry is based.

The other region, in Lapland, north of the Arctic Circle, yields a high-phosphorous iron ore chiefly for export. The deposits in central Sweden are estimated at about 220 million tons, and those in Lapland, considered among the richest in the world, are estimated at over 2 billion tons of iron ore.

Sweden's mining production, 1961-1965, (in thousand metric tons), was as follows:(1)(2)

	1961	1962	1963	1964	1965
Gold Ore	52.1	76.7	59.4	61.3	44.2
Iron Ore	23,593.0	22,526.2	23,636.6	26,591.9	29,353.4
Pyrites	438.2	577.6	402.6	452.4	441.4
Silver and Lead Ore	87.4	94.5	102.7	91.9	94.4
Zinc Ore	142.5	146.0	147.7	139.2	142.4

The Swedish iron ore deposits are favourably situated, from the point of view of transport economics, in relation to the market areas. The all-year-round ice free Norwegian harbour of Narvik is the main shipping port.

9. Industry

Industrialization in the European sense came late to Sweden. Since it has come, towards the latter half of the nineteenth century, it has developed very rapidly.

Industry today accounts for close to 40% of the total G.N.P. in Sweden. The production volume of industry rose about 4% annually during the 1950's and about 6.5% a year from 1960 to 1965. In 1966, this percentage was 4%.

The index of selected industrial production in Sweden was as follows:

1959 = 100

	1961	1962	1963	1964	1965	1966
Iron ore mines	130	126	131	148	164	157
Foodstuffs	109	115	117	122	126	133
Textiles	109	111	117	120	119	111
Shoes	100	104	109	111	108	89
Ready made clothing	115	120	126	131	131	125
Wood	115	120	129	145	158	159
Pulp	121	108	118	136	138	130
Paper and paper board	119	121	137	149	158	161
Rubber	121	121	128	146	160	157
Quarrying, clay, glass	116	122	134	154	174	182
Iron and metals	129	136	144	165	182	188
Metal and engineering	121	134	140	152	166	176
Mining and manufacturing total	118	125	133	146	157	163

Source: Monthly Digest of Swedish Statistics.

Note: (1) One metric ton= 2,204.6 lbs.
(2) Source: The Europa Yearbook.

Swedish industry centers around the country's three principal resources: forest, iron ore, and waterpower. Sweden's main industries are lumber, pulp and paper; iron and steel manufacturing.

Sweden's industrial pattern has been undergoing a change since the Second World War, reflecting a national policy of placing greater emphasis on the exportation of manufactured goods.

Postwar investment in the forest products and iron and steel industries has been concentrated on modernization of plant and equipment.

In Swedish industry small enterprises predominate. By far the greater part of Swedish industry is in private hands.

9a. Steel and Iron Industry

Sweden has long had a vigorous iron and steel industry. Its exports have been concentrated on highly processed quality steels.

Ten per cent of the iron mined in Sweden is refined as pig iron within the country. Most of the pig iron is used directly in the production of steel. Sponge iron, which is important in the production of high quality steel, is being produced in increasing quantities.

The output of the Swedish steel industry is considerable by international standards. Swedish production is in fact spread over 33 manufacturers, most of them small. No Swedish works produce even as much as 1 million tons.

Typical for Swedish steel production is a high percentage of electric steel owing to an ample supply of water power and a lack of fossil fuels. The electric steel process has been adopted for special steels as well as for commercial grade steel.

The selected data on the Swedish steel market, 1936-1966, was as follows: (2)

'000 tons

	Production							
	Pig iron	High carbon and alloy ingots	Ordinary ingots	Finished steel	Imports of finished steel	Exports of finished steel	Steel supply (1)	Iron ore exports
1936—38 average .	634	450	548	703	457	177	985	12 616
1961	1 761	909	2 585	2 407	1 012	640	2 779	20 265
1962	1 827	828	2 724	2 503	949	677	2 775	19 397
1963	1 888	868	2 977	2 723	951	787	2 887	20 256
1964	2 173	1 105	3 278	3 076	1 180	969	3 287	24 343
1965	2 287	1 228	3 432	3 275	1 339	947	3 667	24 461
1966	2 229	1 245	3 455	3 370	1 249	1 040	3 579	22 288

Note: (1) Production + imports - exports.
(2) Source: Sweden's Economy, 1966.

Spurred by a constant increase in consumption, the Swedish steel industry has expanded at a particularly rapid pace during the last ten to fifteen years.

Demand of steel in Sweden exceeds supply and a part of Swedish consumption is met by imports, mainly from EFTA countries, and the United States. On the other hand, the Swedish steel industry has specialized in certain types of high grade steel that are exported to all parts of the world. As a result, Sweden both imports and exports steel in considerable quantities.

According to the Swedish forecast, exports of iron and steel should increase by an average of 7% p.a. between 1965 and 1970.

9b. Engineering Industry

The engineering (and metal) industry is the largest industrial sector in Sweden. It accounts for almost 40% of the country's exports and almost one half of all industrial production.

The engineering industries have attained their economically favourable position during the last decades. Certain branches are dominated by a few large firms, but the vast majority consist of small or medium-sized units.

The Swedish engineering industry has, to some extent, concentrated on products designed for the home market. These products have gradually found a growing outlet on world markets. Industry manufacturing power-generating equipment and electrical machinery have grown up in order to take care of the Swedish hydro-power resources. The Swedish mining industry and forest industry have also given rise to a machine industry, the products of which are to an increasing extent finding their way to export markets.

A significant factor in the engineering industry is a high investment level that has made extensive automation possible.

The main branches of Sweden's Engineering industry are:

Iron and Metal Manufacturing, including manufacture of tools, carpentry implements and special instruments. Other products are locks, hinges, fittings and cast iron for construction.

Mechanical Engineering Industry. The list of manufactured items is especially extensive and includes ball bearings, steam turbines, separators, automatic lighthouses, office and agricultural machines, compressors, etc. Characteristic of this industry is its many affiliates established abroad.

Electro-Technical Industries. There are two large firms (ASEA and L.M. Ericson's), and a number of medium-large and small companies. ASEA has supplied installations for large power stations and L.M. Ericson's developed tele-communications systems.

Motor Industry. During the last decade the Swedish motor industry has shown a considerable growth.

Road vehicle production in Sweden was as follows, (thousands of vehicles):

	1960	1961	1962	1963	1964	1965
Passenger Cars	110	112	130	147	162	182
Trucks and Buses	19	20	22	21	22	24
TOTAL-	129	132	152	168	184	206

In Sweden, there are three domestic producers: Volvo, SAAB and Scania Vabis.

Despite the fact that Sweden has a considerable domestic production, low customs barriers and favourable import policy have made the Swedish auto market highly competitive.

Registration of new passenger cars in per cent, according to country of origin:

	1955	1960	1965
Sweden	23.1	33.7	31.0
West Germany	46.1	47.8	48.5
Great Britain	15.6	8.5	9.7
France	4.2	5.7	6.3
United States	6.1	2.0	2.3
Italy	3.2	1.6	1.4
Other countries	1.7	0.7	0.8
TOTAL-	100.0	100.0	100.0

Source: Swedish Institute.

Number of Passenger Cars in Sweden by Makes, End of 1964

	000's	%		000's	%
Volvo	411.6	24.5	Renault	30.3	1.8
Volkswagen	320.8	19.1	Fiat	27.9	1.7
Opel	238.2	14.2	Peugeot	25.4	1.5
Ford	176.3	10.5	Vauxhall	22.5	1.3
Saab	146.8	8.8	Simca	18.0	1.1
Mercedes Benz	67.6	4.1	Chevrolet	11.9	0.7
BMC	64.0	3.8	Others	80.0	4.8
DKW	34.6	2.1	TOTAL-	1,675.9	100.0

Source: Some Data About Sweden.

The special problems of the Swedish motor industry may be briefly summed up under the three heads: Keen competition, relatively short production run and high wages.

Sweden is also an exporter of passenger cars, trucks and buses. The largest market for the Swedish motor industry are the EFTA countries, which take 46.5% of total exports of passenger cars and 56.4% of total exports of trucks and buses (1965). The United States is in second place, taking 29.1% of total passenger car exports. Of the total car output in 1966, 60% was for export against 48% in 1965. On the other hand, car imports in 1966, fell by 30% to 148,000 units.

Swedish export of passenger cars to Canada, was in 1965, 3.7% of total exports.

Shipbuilding

During the last 50 years, the Swedish shipbuilding industry has undergone a vigorous growth. Shipbuilding is highly oriented to the international market and the larger part of its output is exported.

The Shipbuilding in Sweden, production, deliveries and order, 1962-1966, were as follows:

	Launched tonnage	Delivered tonnage			Export value[1]	New orders	Orders on hand, Dec. 31		
		Total	Exports				Total	For export	
	1 000 gross tons			%	mill. kr.	1 000 gross tons			%
1962 . . .	857	866	626	72	1 061	161	1 860	1 460	80
1963 . . .	878	967	794	82	1 310	1 600	2 620	1 980	76
1964 . . .	1 020	1 025	738	72	1 184	772	2 648	2 070	78
1965 . . .	1 219	1 331	1 045	79	1 480	1 322	2 613	1 896	73
1966 . . .	1 161	1 131	744	66	988	1 148	2 474	1 654	67

[1] Incl. older ships

Source: Sweden's Economy 1966. Swenska Handelslanken.

Sweden accounted for about 10% of the world's manufacture of ships and, after Japan and Great Britain, ranked third in the world's tonnage produced.

Recently the position of the Swedish shipyards became difficult. Order books are still sufficient to ensure a reasonable level of production in 1967 and 1968. But the inflow of new orders has fallen sharply.(1)

The extraordinarily recent large expansion in Japanese shipbuilding has resulted in a considerably surplus capacity in the worlds shipyard

Note: (1) Source: O.E.C.D. Economic Survey - Sweden.

industry. This has led to a price competition that has had almost catastrophic consequences for the European yards.

9c. Pulp and Paper Industry

The pulp mills in Sweden are mostly located close to the saw mills in the northern part of the country. Sweden accounts for roughly 15% of the world's total pulp production and for 25% of the world's total pulp exports.

The Swedish pulp industry is to a very high extent based on exports. Of the total pulp production, about 60% was exported, while the remainder was converted into paper in Sweden. The largest importer of Swedish pulp products is Great Britain, followed by West Germany and the other EEC countries.

Swedish pulp production, 1950-1966, was as follows:

'000 tons

Year	Total	Mechanical	Dissolving	Sulphite	Sulphate
1950	3,200	735	370	1,055	1,040
1955	3,910	880	395	1,275	1,360
1960	4,950	1,100	470	1,455	1,925
1962	5,100	1,150	385	1,420	2,145
1963	5,400	900	395	1,510	2,595
1965	6,500	1,300	400	1,700	3,100
1966	6,637	1,276	140	2,189	3,032

Source: Some Data About Sweden, 1967-68.

According to an Economic Survey, prepared by Svenska Handelsbanken, Stockholm, one of the reasons for the recent comparatively favourable trends in sales volume of Swedish pulp, was that North American pulp sales on the West European market increased less than expected, partly due to a rapid rise in pulp consumption in the United States and to delays in the expansion of the Canadian pulp industry. By 1970, capacity of the Swedish Pulp Industry is expected to have risen from 6.5 million tons (1965) to about 9.5 million tons.

Sweden follows the United States and Canada as the world's third largest producer of wood pulp.

Sweden's paper production has been dominated by newsprint and kraft paper. In 1966, total output of Sweden's paper and board industry was 3.18 million tons of which 0.83 million tons was kraft paper; 0.69 million tons was newsprint.

Sweden's production of paper and board, 1963-1966, was as follows:

'000 tons

	1963	1964	1965	1966	Percentage Change 1965	Percentage Change 1966
Kraft paper	706	760	807	832	+ 6	+ 3
Sulphite wrapping paper	188	202	205	204	+ 1	- 1
Greaseproof paper & parchment	37	38	35	36	- 8	+ 1
Newsprint	635	685	679	689	- 1	+ 1
Journal paper	196	191	221	214	+16	- 3
Fine paper	199	216	221	238	+ 2	+ 8
Other paper	179	228	274	262	+20	- 4
Cardboard	533	596	680	709	+14	+ 4
TOTAL-	2,673	2,916	3,122	3,182	+ 7	+ 2

Source: Sweden's Economy 1966.

The percentage change of production in 1966 was +2%. The rise in production in 1967 is expected to be about 5%.

The countries of Western Europe have traditionally been Sweden's largest customers, taking in 1965, over 80% of her total paper exports. Sweden's largest single customer is West Germany, which nowadays purchases about 28% of Sweden's paper exports.

The Swedish pulp and paper industry is one of Canada's important competitors in European markets.

For the period 1965-1970, the Swedish pulp and paper industries are expected to expand by 44%. This means a yearly expansion of 7.5% compared with 6% in the past ten years.

The paper and pulp industries require a high input of capital. Very large investments are consequently needed to achieve the planned increase in production.

9d. Chemical Industry

The chemical industry has expanded during the last decade, more rapidly than any other sector. The main development in recent years has been the establishment of a major petrochemical industry on the west coast.

Total exports of chemicals are equivalent to 15% of chemical production. While Sweden is self-sufficient with regard to phosphorous fertilizers, the entire supply of potash and half of the nitrogen fertilizers are imported.

The output of the Swedish chemical industry has been rising at a rate of about 5 per cent and more a year over the past decade. In recent years the exports of chemicals have been rising, but so have imports.

In 1966, the chemical industry accounted for about 15% of total industrial investments. During the next five-year period the chemical industry is expected to grow at a faster rate than any other industry.

According to the Statistical Yearbook of the United Nations, Sweden's production of selected chemicals was as follows:

(thousand metric tons)

	1960	1961	1962	1963	1964	1965
Rayon and acetate continuous filament	7.9	7.8	9.2	8.3	8.6	8.1
Rayon and acetate discont. filament	20.2	22.3	22.3	23.3	27.8	29.3
Sulphuric acid (100% H_2SO_4)	409	419	450	475	524	-
Hydrocloric acid (in terms of 100 HCL)	36.1	41.1	44.1	48.7	54.9	-
Nitric acid (100% HNO_3)	117.9	148.1	142.6	163	184.8	-
Caustic soda	183	190	195	208	233.0	-
Superphosphates	498	509	558	517	-	-
Nitrogenous fertilizers	50.3	58.2	54.7	70.6	71.2	95.1

Note: - Not available.

9e. Textile and Clothing Industries

The output of the Swedish textile and clothing industries is highly dependend on imports of raw materials. The supply of domestic wool is insignificant and the only natural fibres grown at home - flax and hemp - are produced in small and steadily decreasing quantities. An exception here is cellulose, which in the production of rayon constitutes a full domestic raw material.

The Swedish textile and clothing industry, production and market conditions, 1963, were as follows:

Item	Domestic production	Imported	Exported	To domestic market	Degree of self-sufficiency, %
Yarn & thread, all materials Mkg.	47.0	18.9	1.5	64.4	72
Clothing fabrics, km	86,981	83,152	13,133	156,800	55
Furn. fabrics, km	47,276	17,579	3,807	61,048	77
Other fabrics, Mkg.	11.2	5.9	2.6	14.5	77
Mats, carpets, Mkg.	2.9	4.1	0.4	6.6	44
Rugs, blankets, mill.	1.3	0.3	0.2	1.4	93
Knitwear, hose, Mkg.	8.7	4.7	1.0	12.1	72

9f. Food Industries

The food industries rank, after the metal and engineering industries, as the country's second largest industry in terms of added value.

With the exception of several typically Swedish specialties, such as rye crisp and marinated herring - which are extensively exported - food production is directed at the domestic market.

Another significant development in the postwar period is the expanded production of packaged and frozen foods.

Production in the food industry, including beverages and tobacco products, increased by 7% in 1966, following a 4% rise in 1965. Sweden's exports of food increased in 1966 by 7%.

10. Electricity

Sweden is rich in timber and waterpower, but lacking significant resources of fossil fuels. The supply of energy in the country has therefore been based principally on domestic waterpower (and wood) and on imported coal and oil. In view of the lack of domestic oil and coal resources, the availability of relatively cheap waterpower has been an important factor in Sweden's development to a highly industrialized country.

The relative importance of energy sources in Sweden (in calories) in 1965, is shown by the following table:

Sources:	%
Oil	55%
Electricity	35%
Coal	6%
Others	4%
TOTAL-	100%

According to the table below, about 82% of the installed capacity of electric energy in Sweden is "hydro", (average 1960-1965). About 75% of the hydro-electric power is generated in northern Sweden. Vast distances exist between the major sources of hydro-electric power-waterfalls in Northern Sweden and the densely populated consumer areas in the south.

Thermo-power plant expansion is dependent upon the price of fossil fuel. At the present time, thermo electric power in Sweden is used chiefly during periods of peak loads.

Installed capacity of electric energy in Sweden, (1) (thousand KW):

Code (2)	Type (3)	1960	1961	1962	1963	1964	1965
I + P	Total	8,957	9,750	10,617	11,040	11,304	11,660
	Hydro	7,005	9,471	8,285	8,872	9,069	9,278

Note: (1) The data represents the nominal end-of-year capacity of all generators available for simultaneous operation in hydro-electric and thermo-electric plants.
(2) P - enterprises generating primarily for public use.
I - industrial establishments generating primarily for its own use.
I + P - total installed capacity.
(3) Total means entirely thermal. "Thermal" can be derived by subtracting "hydro" from "total", except in the countries in which "nuclear" and "geothermic" are produced.

Source: United Nations: Statistical Yearbook.

The production of electric power in Sweden increased in 1965 by 7.7% to 49,100 million Kwh. The electricity consumption is increasing at a rate of about 6.5% each year and this development is expected to continue. Sweden's total production of electric power in 1966 was 51,000 million Kwh.

The entire increase was in thermal power output. The production of electric power is expected to increase by 7% in 1967.

The general rise in production in the country was accompanied by a further rapid increase in energy consumption. Beginning at the 1970's, most of the planned expansion of capacity will be in thermal power stations.

Domestic electricity consumption is divided as follows:

Industry	65%
Transportation	5%
Retail (domestic) Consumers	30%

In 1965, government plants produced 45% of the total electricity output in Sweden, plants totally owned by local authorities, 8% and plants mainly privately owned, 47%. Of the 47% that was privately generated, 20% went directly to industrial use, chiefly the firm owning the plant, while the remaining 27%, partly produced by companies having local authority participation, was sold.

Energy consumption in Sweden, per capita, 1962-1965, was as follows:

1962	3,811
1963	3,950
1965	4,506

Note: Consumption data is based on the apparent consumption of coal, lignite, petroleum products, natural gas, hydro and nuclear electricity.

Source: United Nations: Statistical Yearbook.

Sweden with other Scandinavian countries makes up a co-ordinated power bloc. Sweden supplies excess power in the summer and buys power when needed in the winter and during dry years.

In the summer months Sweden generates a power in excess of its own requirement and this is sold to other members of the bloc. In winter, and during dry years, Sweden buys from the bloc.

11. Atomic Energy

Sweden is actively engaged in developing the use of atomic energy in electric power production. A commercial nuclear power station is scheduled to start operations in 1970. This project is financed by Swedish municipalities and private firms.

Sweden wants to be less dependent on the import of fuel. For this reason, Sweden seems ready to push development of a reactor, even if it takes years before nuclear power from it is competitive with that delivered from conventional thermal stations.

Neither coal nor petroleum are indigenous to Sweden, whereas uranium is, although low in grade. This fact alone was sufficient to spur the country into a nuclear power program.

Sweden has considerable deposits of shale with uranium content which is mined at Kvarntorp (in central Sweden). A uranium mill to process shale is being erected at Billingen. Refinement of domestic uranium ore provides 120 tons of pure nuclear fuel per year.

Sweden's atomic energy programme got off to an early start. "A.B. Atomenergi" was formed as early as 1947. In this enterprise, the State holds 4/7 of the shares and private and municipal interests hold the remainder. "A.B. Atomenergi", at present, is chiefly concerned with the planning and operations of nuclear power stations.

According to the "Atomic Handbook", the aim of the Swedish nuclear energy programme is to develop reactors suitable for Swedish conditions that are manufactured in Sweden. It is also intended to develop an atomic industry capable of exporting reactors and reactor components.

The Agesta reactor (near Stockholm) is rated at 65 M.W. of which 10 M.W. is

for electricity production and the remaining 55 M.W. is utilized for district heating in the Stockholm suburb of Farata.

Sweden's main research centre is at Studsvik. There is the R_2 swimming pool reactor which is used for material testing as well as for the production of isotopes.

In Sweden, about 31,000 curies of radioisotopes were used in 1964, Principal fields of use include: gauging, radiography and testing for industry, medical therapy and diagnostic, and research in many fields.

Sweden's current and future installed energy capacity is as follows:

Description	December 1964 M.W.	1970 M.W.	1980 M.W.
Hydroelectric	8,600	10,800	12,700
Fossil	2,600(1)	3,200(2)	3,800(3)
Nuclear	10	200	3,800
Other	-	14,200	20,300
TOTAL-	11,210	28,400	40,600

Note: (1) Including 1000 M.W. back pressure.
(2) Including 1400 M.W. back pressure.
(3) Including 2000 M.W. back pressure.

Source: Atomic Handbook.

12. Gross National Product

Gross National Product in constant prices increased by about 38% between 1958 and 1965. G.N.P. per capita in Sweden rose during the same period by 33%. It is anticipated that Swedish G.N.P. will increase by 4% during 1967.

The balance of resources, in Sweden, 1965-1970, (calculated) is as follows:(1)

(million krona, 1964 prices)

	1964	1965 (prel.)	1970	Change 1965—1970		
				Million kr.	Per cent	
					Total	Per annum
SUPPLY:						
GNP	97,550	101,400	124,500	+ 23,100	+ 22.8	+ 4.2
USE:						
Private consumption	51,600	53,650	63,350	+ 9,700	+ 18.1	+ 3.4
Public consumption	13,700	14,500	18,200	+ 3,700	+ 25.8	+ 4.7
Gross investments	31,400	33,300	41,900	+ 8,600	+ 25.8	+ 4.7

Local authorities	7
Total production of services	48
Total	100

In 1965, G.N.P. at market prices per capita, was U.S. $2,505.

Note: (1) Source: The Swedish Economy, 1966-1970.

According to "The Swedish Economy, 1966-1970", the development of production sectors, 1965-1970, in percentage per annum, is as follows:

Agriculture	-1
Forestry	2½
Mining and Manufacturing	5
Power	6
Building and Construction	5
Total Production of Power and Goods-	4½
Communications	5
Transportation	4½
Post and Telecommunication	5½
Trade	4
Private Services	3½
Housing, etc.	4½
Public Services	4
Central Government	3½
Local Authorities	4½
Total Production of Services-	4
TOTAL-	4.2

The percentage change from previous year, 1961-1966, (1959 prices) of G.N.P. and selected factors of Swedish national accounts, was as follows:

	1961	1962	1963	1964	1965	1966
Gross National Product	5.8	3.4	4.5	7.1	3.7	3.1
Imports of goods	0.6	6.4	6.9	10.3	11.3	2.3
Total supply	4.8	3.9	4.9	7.7	5.1	3.0
Exports of goods and net services	4.3	8.0	7.1	10.9	3.6	5.6
Domestic demand	4.9	3.0	4.4	7.0	5.5	2.3
Private consumption	5.1	3.6	4.9	5.3	4.4	2.3
Public consumption	5.1	3.7	7.4	5.1	7.2	5.8
Gross fixed asset formation (1)	6.1	4.9	5.3	5.9	4.2	3.7
Change in stocks (2)	1.7	0.7	-0.2	1.3	2.0	1.2

An increasingly large percentage of G.N.P. has gone into investments.

13. Foreign Trade

Sweden has a population of less than eight million, and like most smaller industrial countries it is strongly dependent on foreign trade which is vital for Swedish prosperity. The high standard of living has to be based

Note: (1) Including maintenance, repairs and military investment.
(2) Per cent of G.N.P.
Source: Preliminary Swedish National Budget for 1967 and National Institute of Economic Research.

on high quality production and the marketing of these products all over the world. Sweden's economy is therefore more outward oriented than that of most other countries.

Foreign trade has thus been one of the most expansive and dynamic sectors of Sweden's economy during the last two decades.

In general, the increase in imports of various commodities has gone together with an increase in domestic consumption.

Swedish exports during the last decade have changed emphasis from the traditional raw materials, such as, iron ore and wood pulp, towards highly manufactured products and, to some extent, from investment goods to consumption goods. The exports of engineering products have expanded so strongly that it is today a leading export commodity group.

Continuous economic expansion and a rising standard of living have contributed to a large increase in imports into Sweden during the postwar period. At current prices, Sweden's imports increased from 6,100 million krona in 1950 to 23,660 in 1966.

The main categories of Sweden's imports comprise foodstuffs, raw materials and fuels, chemicals, textiles, base metals, machinery, apparatus and means of transport. The remainder consists mostly of various finished goods.

Swedish Imports by Main Groups of Commodities, 1937-1966, were as follows:(1)

Groups of Commodities	1937 SKr. Mill.	1937 Per Cent	1950 SKr. Mill.	1950 Per Cent	1966 SKr. Mill.	1966 Per Cent
Agricultural products	395	18.7	1,165	19.1	2,940	12.4
Fuel & power	325	15.3	1,045	17.1	2,685	11.4
Chemical products	160	7.5	350	5.7	1,870	7.9

Machinery & instruments	210	9.9	730	12.0	5,300	22.4
Transport equipment	100	4.7	415	6.8	2,150	9.1
Textiles & shoes	340	15.9	1,060	17.4	2,110	8.9
Other goods	270	12.7	660	10.8	3,705	15.6
Total Imports-	2,125	100.0	6,100	100.0	23,660	100.0

Note: (1) Source: Some Data About Sweden.

Sweden's Imports of Selected Commodities by Quantities, 1950-1966, were as follows:(1)

	1950	1966
Meat and pork (tons)	25,000	21,800
Fruit (tons)	175,000	317,600
Coffee, unroasted (tons)	34,100	96,800
Hides and skins, undressed (tons)	22,500	19,400
Rubber, natural (tons)	14,500	30,500
Cotton, raw (tons)	27,200	18,200
Coal and coke (1000 tons)	7,100	3,200
Mineral oils (1000 tons)	3,600	22,600
Pig iron (tons)	107,400	425,000
Iron and steel, commercial (tons)	582,000	1,242,000
Copper (tons)	37,800	55,700
Aluminium (tons)	8,400	41,100
Automobiles and trucks (units)	51,800	148,000

The Composition of Swedish Imports by Selected Commodities and Change, 1965-1966, total and percentage of total, was as follows:(2)

Imports	1965 Mill. Kr.	1966 Mill. Kr.	Change Mill. Kr.	Change %
Coal and coke	297	302	+ 5	+ 2
Petroleum	2,038	2,245	+ 207	+ 10
Textile fibres and textiles	2,211	2,142	- 69	- 3
Steel	1,280	1,229	- 51	- 4
Nonferrous metals	1,045	1,135	+ 90	+ 9
Machinery and instruments	4,679	5,085	+ 406	+ 9
Motor vehicles and components	1,851	1,581	- 270	- 15
Aircraft and ships	460	460	0	0
Food	2,244	2,477	+ 233	+ 10
Chemical products	1,746	1,872	+ 126	+ 7
Other goods	4,792	5,134	+ 342	+ 7
TOTAL-	22,644	23,662	+1,018	+ 4

The high proportion of import coming from Europe has increased from 71.2% in 1955 to 76.2% in 1966. West Germany is the main supplier of goods to Sweden with a share of 20.2% of total imports in 1966. The United Kingdom is Sweden's second largest supplier of goods with a share of 15.3% of the total in 1966. The third place among Sweden's suppliers is held by the United States, which in 1966 accounted for 9.3% of Sweden's total imports, followed by Denmark, Norway, the Netherlands and France.

Note: (1) Source: Some Data About Sweden.
(2) Source: Sweden's Economy 1966.

Looking back over the past sixteen years, (1950-1966), we can observe that the share of agricultural products in Sweden's exports decreased from 8.1% to 3.2%; forest products from 42.4% to 27.1% and iron ore from 6.9% to 4.7%. At the same time, a strong displacement towards more processed goods has been accentuated. The leading role in this development has been played by the metalworking industry. The share of the machinery and instruments increased from 1950 to 1966, from 13.8% to 24.5% and of transport equipment, from 7.8% to 11.7%.

The share of pulp, paper and cardboard has shrunk from 30.8% in 1950 to 19.9% in 1966.

In the changed pattern of exports, the new export commodities, particularly nonelectric machines, are an important and highly expansive feature.

Sweden's Exports by Main Groups of Commodities, 1937-1966, were as follows:(1)

Groups of Commodities	1937 SKr. Mill.	1937 Per Cent	1950 SKr. Mill.	1950 Per Cent	1966 SKr. Mill.	1966 Per Cent
Agricultural products	140	7.0	460	8.1	700	3.2
Forest products	850	42.6	2,420	42.4	5,990	27.1
Timber	(260)	(13.1)	(665)	(11.7)	(1,585)	(7.2)
Pulp, paper and cardboard	(590)	(29.4)	(1,755)	(30.8)	(4,405)	(19.9)
Iron ore	215	10.6	395	6.9	1,040	4.7
Base metals and their products	320	16.1	665	11.6	3,175	14.4
Machinery and instruments	190	9.5	785	13.8	5,425	24.5
Transport equipment	85	4.2	445	7.8	2,590	11.7
Other goods	200	10.0	535	9.4	3,180	14.4
Total Exports-	2,000	100.0	5,705	100.0	22,100	100.0

Sweden's Exports of Some Principal Commodities, 1950-1960, were as follows:(1)

	1950	1966
Iron ore (1000 tons)	12,900	22,300
Timber (1000 cu.ft., solid volume)	145,000	246,500
Mechanical pulp (tons)	283,100	450,400
Chemical pulp (tons)	1,798,100	3,163,500
Newsprint (tons)	203,100	427,100
Other paper and cardboard (tons)	524,500	1,608,000
Fibreboard (tons)	137,500	362,600
Ball-bearings (SKr. 1000)	115,900	291,300
Electric generators and motors, etc. (SKr. 1000)	33,200	239,000
Telephone and telegraph equipment (SKr. 1000)	46,400	508,000
Office machinery (SKr. 1000)	48,100	544,900
Ships and boats (SKr. 1000)	362,800	987,900
Automobiles and trucks (units)	1,500	125,600

Note: (1) Source: Some Data About Sweden.

The Composition of Swedish Exports by Selected Commodities and Change, 1965-1966, total and percentage of total, was as follows:(1)

Exports	1965 Mill. Kr.	1966 Mill. Kr.	Change Mill. Kr.	Change %
Forest industry products	5,852	5,988	+ 136	+ 2
of which: sawn or planed timber	1,342	1,253	- 89	- 7
pulp	2,210	2,300	+ 90	+ 4
paper and cardboard	1,694	1,832	+ 138	+ 8
Iron ore	1,121	1,039	- 82	- 7
Steel	1,665	1,846	+ 181	+ 11
Machinery and instruments	4,512	5,410	+ 898	+ 20
Motor vehicles and components	1,179	1,472	+ 293	+ 25
Ships	1,480	988	- 492	- 33
Food	584	627	+ 43	+ 7
Chemical products	721	831	+ 110	+ 15
Other goods	3,428	3,902	+ 474	+ 14
TOTAL-	20,541	22,103	+1,562	+ 8

Sweden is the second largest world exporter of iron, and accounts for 1/6 of the world's entire iron exports. The most important export item among forestry products is paper pulp. Sweden accounts for about 1/3 of the world exports of this product. Exports of engineering products are nearly 40% of Sweden's total exports.

From 1955 to 1965, Sweden has increased its share of world exports from 2.1% to 2.5%.

The traditional concentration of Swedish exports on Europe has become more marked in recent years. The share of Europe in Sweden's exports was in 1965, 81.0% and in 1966, 79.5%.

West Germany is Sweden's main trading partner, answering in 1966 for 12.9% of the total Swedish exports. The United Kingdom, which imported from Sweden in 1966 to a value of 2,806 million krona (12.7% of total), is the second largest market for Swedish goods. In third place is Norway, followed by Denmark, U.S.A., the Netherlands, Finland, France and Italy.

Note: (1) Source: Sweden's Economy 1966.

The Swedish share of selected exports markets, 1960-1966, was as follows:

IMPORTS FROM SWEDEN IN PER CENT OF TOTAL IMPORTS[1]	1960	1961	1962	1963	1964	1965	1966[3]

Source: Sweden's Economy. An Economic Survey prepared by Swenska Handelsbanken.

Sweden is a member of EFTA (European Free Trade Association)(1).

The rate of growth of Sweden's foreign trade, 1959-1966, with selected countries, group of countries and total, was as follows:(2)

(percentage)

	Austria	Denmark	Finland	Norway	Portugal	Sweden	Switzer-land	United Kingdom	Total EFTA	EEC	USA	Eastern Europe	Rest of World	World
Imports 1959-1966	202	203	480	204	112		122	112	156	67	68	92	66	90
Exports 1959-1966	235	169	217	105	252		238	64	118	90	66	66	73	94

The division of Europe into two economic groups makes matters considerably inconvenient for Sweden. Sweden today is still heavily dependent on the EEC as a supplier of manufactured goods. More than half of Sweden's imports from Western Germany consist of engineering products. France supplies Sweden chiefly with semi-manufactures and engineering products. Belgium's exports to Sweden are heavily dominated by semi-manufactures. Imports from Italy are chiefly clothes and shoes.

The recent decline in Sweden's share of EEC imports is no doubt related to the removal of trade barriers within the EEC market.

Although it continues to be doubtful whether Britain will succeed in the near future in its bid for membership in the Common Market, Sweden has filed a formal application for associate membership in the community.

In 1966, the rate of increase in Sweden's exports to several West-European countries slowed down due to reduced demand in the markets for Sweden's staple exports, that is, primarily timber, pulp, ore and steel.

On the other hand, significant rises were registered in Swedish exports to certain countries. For example, exports to France and Italy, expanded by 20% and 26% respectively and to Canada, an increase of as much as 48% was recorded.

By the direction of Swedish trade, Western Europe is absorbing about 70% of Sweden's foreign trade. Swedish trade with the Eastern-European countries runs about 4% of its total foreign trade. Sweden regulates its trade with Eastern Europe by long-term bilateral agreements.

Sweden's dependence upon foreign trade has increased and today Sweden imports and exports more, calculated per head of the population, than most other countries of the world. So, as far as imports are concerned, Sweden is really a much larger market for foreign goods than its population of 7.7 million would indicate. Because of the high standard of living, the ready

Note: (1) The other member states being Norway, Denmark, Great Britain, Austria, Switzerland and Portugal. Finland has become an associate, although on special terms.

(2) Source: EFTA Bulletin, May 1967.

access to the Swedish market for imports, and moderate imports duties, Sweden has become one of the most competitive markets in Europe. The scope for an expansion in Swedish exports will be determined to a great extent by development in the other industrial countries.

14. Canadian Trade with Sweden

Canadian trade with Sweden is based on the United Kingdom-Sweden Convention of Commerce and Navigation of March 18, 1826, which applies to Canada. Canada has with Sweden an exchange of most-favoured-nation treatment.

YEAR	IMPORT	EXPORT	BALANCE
1959	18,077	14,879	- 3,198
1960	20,409	20,906	+ 497
1961	24,221	17,654	- 6,567
1962	25,873	18,230	- 7,643
1963	33,410	20,926	-12,484
1964	38,794	29,922	- 8,872
1965	55,568	28,980	-26,588
1966	72,541	36,574	-35,967

Canadian imports from Sweden, January to April, 1967, were $25,298 thousand in comparison with $25,406 thousand in 1966, or 0.42% less.

Canadian exports to Sweden, January to April, 1967, were $8,837 thousand in comparison with $13,086 thousand in the first four months of 1966, or 32.5% less.

Our trade deficit in the first four months of 1967 is $16,461 thousand.(1)

Our Balance of Trade with Sweden in the last 8 years, with the exception of 1960, has been negative.

Canadian Foreign Trade by Selected Commodities with Sweden, 1964-1966, was as follows:

Note: (1) Source: D.B.S. Trade of Canada.

Source: Dominion Bureau of Statistics, Exports by Countries, 1964 - 1966.

Relatively high wage levels, an acute labour shortage, and the need for optimum space utilization in factories in view of high construction costs, make a good climate for the use of modern material handling techniques and equipment. There is special interest in mechanization and automation programmes.

In Sweden, there are market possibilities for:

Industrial trucks of all types.
Conveyors, lifts and hoists.
Weighing machines and other registering and measuring devices.
Fruit and vegetables, fresh or canned.
Fresh and frozen fish; lobster and seafood in all forms.
Animal and fish oils and fats.
Nonstandard products (specialty) of all kinds.
Machines and instruments for specific industries.
Auto-components.
Logging equipment.
Recreational goods.
Feedstuffs.

Despite the fact that the chemical industry in Sweden is expanding, Sweden will continue to import considerable quantities of various chemical products and plastic raw materials.

Canada will meet very keen competition in the Swedish market. First of all, EFTA countries are integrating foreign trade. For a few years after the war, the United Kingdom took over the traditional German position as the main source of Swedish imports, however, in 1952 Western Germany again passed the United Kingdom.

Swedish exports to Canada have been in recent years increasing constantly, in both value and in the range of commodities. The most important items are machinery and equipment, followed by iron and steel, passenger cars and fur skins. In Canada, there are further possibilities for imports of Swedish furniture and drugs.

The Canadian-Swedish foreign trade is showing each year a more and more diversified picture. Opportunities in Sweden are likely to remain open to Canadian exporters who can compete.

15. Balance of Trade

Sweden's Foreign Trade, Trade Balance, and Volume and Price Index, 1938-1966, were as follows:(1)

	Value, mill. kr.			Volume index 1959 = 100		Price index[1] 1959 = 100	
	Exports fob	Imports cif	Trade balance	Exports	Imports	Export prices	Import prices
1938	1 843	2 082	— 239	51	51	32	33
1962	15 129	16 154	— 1 025	129	126	102	103
1963	16 568	17 552	— 984	140	134	103	104
1964	19 014	19 946	— 932	156	148	106	108
1965	20 541	22 644	— 2 103	164	166	110	110
1966	22 103	23 662	— 1 559	174	169	111	112

The development of Sweden's foreign trade in 1966 gives clear evidence of a better balance in the domestic economy. The import rise slowed down in 1966 to +4%. The small increase in imports last year was influenced by the decline in inventory accumulation, and reflected a sharp fall in imports of automobiles.

Exports in 1966 have benefited from the slackening of home demand. There was particularly strong increase of exports of motor vehicles and components and machinery and instruments. Exports of iron ore and timber fell, reflecting weak foreign demand.

16. Balance of Payments

From 1960 to 1964, the current account of Sweden's balance of payments was very stable, showing only small fluctuations. In 1965 and 1966, relatively large deficits emerged, notably reflecting a marked rise of the trade deficit. There has also been a steady deterioration of the invisible balance, with the increase in shipping earnings being more than offset by expenditure on other services, including tourism.

Note: (1) Source: The Swedish Economy, 1966-1970.

Sweden's Balance of Payments, 1962-1966, was as follows:(1)

(millions of krona)

	1962	1963	1964	1965	1966 (prel.)
Exports, fob	15 129	16 568	19 014	20 541	22 103
Imports, cif	16 154	17 552	19 946	22 644	23 662
Balance of trade	— 1 025	— 984	— 932	— 2 103	— 1 559
Shipping revenues, net	+ 1 445	+ 1 465	+ 1 540	+ 1 590	+ 1 700
Other current payments, net	— 350	— 586	— 690	— 998	— 1 300
Balance of current payments	+ 70	— 105	— 82	— 1 511	— 1 159

In 1967, private consumption is expected to rise more rapidly than last year and the demand for imported goods will probably increase.

In spite of the large deficit in its Balance of Payments, Sweden has so far been able to avoid any outflow of gold and foreign exchange.

Sweden's gold and foreign exchange reserves - including Riksbank's net IMF balance, 1962-1966, were as follows:(1)

(millions of krona)

Year-end	Riksbank	Commercial banks	Total	Change
1962	4 115	492	4 607	+ 493
1963	3 891	595	4 486	— 121
1964	4 929	576	5 505	+ 1 019
1965	4 944	678	5 622	+ 117
1966	5 235	733	5 968	+ 346

17. Economic and Trade Policy

The principal aim of Swedish economic policy is to promote a high rate of economic growth and to curb inflationary tendencies. It is designed to stimulate industrial gross fixed asset formation and to allow some increase in residential construction.

Note: (1) Source: Sweden's Economy 1966. Swenska Handelslanken.

The tendency towards overheating displayed recently by the Swedish economy has been met by a progressively tighter stabilization policy.

Swedish Trade Policy is based on the principle of an international division of labour. Sweden's exporting industries must produce in large series so as to be competitive on the world market. On the import side, there is a consequential emphasis on a minimum of restrictions.

It is necessary for Sweden to maintain free and well-balanced foreign-trade. Since a substantial part of Sweden's national product - about one fifth - is exported, the Swedish economy is susceptible to cyclical fluctuations of foreign demand.

Sweden is a typical low-tariff country. The Swedish Industry has thus been forced to fight in the hard climate of free competition.

Raw materials are normally admitted duty-free and the tariffs on imported semi-manufactures are relatively low. The Swedish tariff level on finished goods rank with the lowest in the world. Agriculture in Sweden is protected by a system of import duties, but this does not prevent imports of great quantities of foodstuffs and other agricultural products.

The Swedish Customs Tariffs consist principally of "ad valorem" duties. The few specific duties - mainly on foodstuffs - are payable on the actual net weight.

Licences are required only for the importation of a very small number of articles, practically all of them in the agricultural sector, and for imports from certain countries in Eastern Europe and the Far East. Foreign currency is made available without restriction to Swedish importers for purchases of goods abroad. Payments for imported and exported goods as well as commissions, royalties, wages, licences and other fees, may thus be remitted and received freely.

17a. Investment

While investment requirements in Sweden seem to be growing strongly, the self-financing capacity of industrial, commercial transport and other companies has been greatly reduced during the 1960's. This development is partly the result of the steep rises in wages and social changes and partly of the hardening international competition which has made it impossible for companies to offset the cost increases by raising prices.

According to "Swedish Economy, 1966-1970", Gross Investment in Sweden in different sectors, 1950-1970, was as follows:

(million krona, 1964 prices)

	1950	1955	1960	1964	1965	1970	Annual average for the period			
							1951—1955	1956—1960	1961—1965	1966—1970

In an attempt to stimulate industrial investment, the Government has recently presented a proposal for the establishment of a kind of State Development Bank. The Bank's basic capital - roughly $100 million - will be financed through tax increases, but any additional funds that are required will be procured by borrowing on the capital market.

Unless a marked change occurs, the business sector's need for external financing will continue to grow. No special incentives are given in Sweden to foreign investment.

The Riksbank granted permits for investment abroad in 1966, amounting to Kr.735 million as compared with Kr.538 million in 1965. Of these permits, Kr.256 referred to investment in new companies as compared with Kr.108 million in 1965. Over 85% of the investments were in manufacturing companies and nearly 15% in trading companies. One-third of investment is related to the EEC, just over one-fifth to EFTA and one-fifth to developing countries.

Foreign investments authorized in Sweden during 1966 amounted to Kr.654 million, which was twice as much as in 1965. The U.S.A. and Canada accounted for one-half, the EFTA nations for more than one-quarter and the EEC for one-fifth of the total.

Direct investment abroad by Swedish residents requires individual authorization, which is normally granted.

Direct foreign investments in Sweden require authorization, which normally is given. Liquidation of such investments and the transfer of proceeds, including appreciation, requiresauthorization, which always is given.

17b. Licensing, Patents

Patents in Sweden are granted for 17 years from the date when petition is filed with the Swedish Patent and Registration Office. The Government may cancel patent rights, with due compensation, when such action is considered a public necessity. Renewal fees are due annually from the fifth year.

Trademark protection is granted for 10 years and may be renewed indefinitely.

There are no limitations on royalties or technical fees, or their transfer abroad.

18. Conclusions

The recent economic situation in Sweden has been characterized by a continued expansion of production and incomes with several signs of overheating. Increased production generates a greater need for raw materials, semi-fabricated products and capital goods.

A key question for the assessment of Sweden's future economic development is the extent to which the reversal for the labour force can be counter-

balanced by a more rapid increase in work productivity and technological progress.

A further problem seems to be that, in Sweden, production units in many industries are relatively small. A continued movement towards bigger units is, however, likely to take place.

Rising prices and wages remain a problem for the Swedish economy. Consumer prices in 1966 moved ahead 5.6%. Average hourly earnings in mining and manufacturing jumped about 9%.

To counteract the effect of rising labour costs, the Swedish Government is trying to stimulate the process of rationalization of Sweden's industry by making credit cheaper and more abundant.

The standard of living in Sweden is high and the people demand merchandise of good quality - rarely exclusive but never shoddy. Industry is varied and progressive, offering a favourable market for both raw materials and machinery, though most standard equipment is produced within the country.

Sweden also buys from abroad many foodstuffs and manufactured provisions to supplement its own production.

Sweden's chemical industry is expanding. The increasing use of chemicals in Sweden for a variety of purposes will certainly continue to require considerable imports of various chemical products and plastic bases. In the case of textiles, the rate of increase in imports has for the last ten years been slower than that in most other categories of goods.

Consumption of iron and steel is rising in Sweden. In spite of increasing Swedish production, imports of iron are considerable. There are also large imports of nonferrous metals in addition to manufactured products of iron and steel and other metals.

Swedish technological advances have created a big demand for automatic controls and recorders, industrial process regulating devices, industrial and laboratory testing instruments and equipment and other sophisticated apparatus.

Surveys made in Sweden showed a rapidly growing demand for advanced automotive maintenance testing and repair equipment and for traffic signal and control devices.

The consumption forecast in Sweden predicted that the share of frozen and precooked food will increase rapidly - as a result of increased employment of married women outside the home. Sales of deep frozen foodstuffs were roughly three times greater in 1966 than in 1960. An increase in the sales of household durables is expected as a result of the rise in the number of new households. There is also a trend towards larger apartments.

The market for recreational products in Sweden will be of growing importance. One of the reasons for this development is the increase in statutory vacations to four weeks in 1965. Furthermore, rising incomes will enable people to spend more money on their increased leisure.

The Swedish economy has enjoyed a steady growth during the last decade, but Sweden is not an easy market. Tariffs are low and the competition on the Swedish market is keen.

TABLE I
